

Site preparation:

For level ground

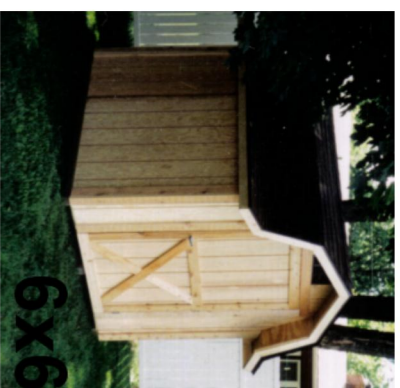

Stone base can be used, 3 to 4 inches deep. We recommend 12" bigger than the building all around the edge.  
Stone base should be level.

For sloped ground  
Treated wood timbers, concrete block or post and frame is recommended.  
Custom site preparation service is available.

Our commitment is to provide our customers with attractive high quality buildings you will be delighted to own and enjoy!
